CANADIAN PATENT

No. 374,729. Poultry Package.
Colis de volaille.

Industrial Patents Corporation, assignee of Charles T. Walter, both of Chicago, Illinois, U.S.A., 28th June, 1938. Filed 16th July, 1936. Serial No. 432,623.

Claim.—1. The method of packing carcasses of fowl which have been dressed and drawn, which comprises separating the carcass into parts and thereafter arranging the separated parts in a packing tray in recesses provided therefor.

2. The method of packing poultry carcasses which have been dressed and drawn, which comprises separating the carcass into parts and thereafter arranging the separated parts in a packing tray in spaced individual recesses provided therefor.

3. The method of packing poultry carcasses which have been dressed and drawn, which comprises separating the carcass into parts, arranging each of the separated parts and the edible organs in individual recesses provided within a packing tray, and applying a transparent wrapper over said tray.

4. A container for packing disjointed carcasses of fowl comprising a pressed paper tray and recesses moulded within the tray for carrying individual portions of fowl, said recesses being of varying shapes and sizes and arranged to substantially conform to the individual portions of fowl packed therein.

Claims allowed, 6.
